PGDBDA Sample Paper-2 (Big Data Technologies)

Course & year	: PG-DBDA , 2022	Date & Session	: TBD ,2022
Subject Name	: BIG DATA TECHNOLOGIES	Max. Time	: 40 -60 minutes
Faculty Name	: Geeta Tripathi	Max. Marks	: 40 Marks
Q.No.	ANSWER ALL THE MCQ QUESTIONS (WITH ANSWER KEYS)	Marks	
1.	_____is a collection of data that is huge in volume, yet growing exponentially with time. (A) BIG DATA (B) BIG DATA BASE (C) BIG DATA FILE (D) BIG DBMS	1	
2.	_____splits the gap between structured and unstructured data, which, using the right datasets, can make it a huge asset (A) Semi-structured (B) Unstructured (C) Structured (D) Cost Data	1	
3.	Which of the following is not a Big Data technology (A) Apache Pytarch (B) R Programming (C) Data Lakes (D) Data Mart	1	
4.	The source of all data in data warehouse is known as: (A) Operational environment (B) Data Warehouse environment (C) Technology Environment	1	

	(D) Formal environment	
5.	The company with the highest hadoop cluster is: (A) Google (B) IBM (C) Facebook (D) LinkedIn	1
6.	In HDFS environment when NameNode goes down the node that takes over is : (A) Node Manager (B) Data Node (C) Secondary Namenode (D) Rack	1
7.	For YARN the UI Manager host and port information is provided by: (A) Namenode (B) Resource (C) Replication (D) Data Node	1
8.	Which of the following property gets configured on mapred-site.xml? (A) Replication Factor (B) Java Environmental Variables (C) Host and Port where MapReduce task runs (D) Directory names to store HDFS files	1

9.	The Hadoop Architecture was adapted from : (A) RAID (B) Distributed File System (C) Google File System (D) Yahoo Distributed File System	1
10.	HDFS is : (A) Resource Management Layer (B) Batch Processing Engine (C) Storage Layer (D) Web Interface	1
11.	Which of the following determines the number of maps: (A) Inputs (B) Outputs (C) Tasks (D) Jobs	1
12.	The output of map tasks is written in: (A) HDFS (B) File System (C) Local Disk (D) Secondary Storage	1
13.	What are the number of stages in which Map Reduce is executed? (A) 2 (B) 3 (C) 4 (D) 5	1

14.	Running which of the following program involves mapping tasks on many or all of the nodes in our cluster. (A) MapReduce (B) Map (C)Reducer (D) Job Scheduler	1
15.	A utility which allows users to create and run jobs with any executables as the mapper and/or the reducer (A)Hadoop Streaming (B) Shuffling (C) Sorting (D) Hadoop Stream	1
16.	The Master Node in Hbase orchestrates (A) Regionserver slaves (B) Zookeeper slaves (C) Hbase Datanodes (D) Thrift client	1
17.	In Hbase columns are organized to : (A) Column Base (B) Column List (C) Column Families (D) Column Group	1
18.	We are using MapReduce Program to write to the Hbase tables , each reduce tasks write to : (A) All the relevant region (B) 1 region (C) 2 Region (D) Local file system	1
19.	An Hbase table accepts [K1, V1] pair of MapReduce programming in which of the following forms:	1

	(A) column attribute: scan result (B) column Family: cell value (C) rowkey: scan result (D) rowid:cell value	
20.	A table in Hbase can (A) Not be drooped, only compressed (B) Directly dropped (C) Dropped after disabling (D) Not dropped, only disabled	1
21.	People use Kafka as a replacement for which of the following solutions: (A) collection (B) log aggregation (C) compaction (D) Partition	1
22.	The category for feed of message maintained in Kafka is called as : (A)Messages (B)Chunks (C)Topics (D) Domain	1
23.	Kafka provides functionality of a messaging system. Is the statement TRUE or FALSE (A) TRUE (B) FALSE	1
24.	In the Apache Airflow the statuses of task and DAGs are tracked by which of the components: (A)Scheduler (B)Metadata Database	1

	(C)Executor (D)Worker	
25.	Can one task be dependent on multiple tasks to start its execution in Airflow? (A) YES (B) NO	1
26.	The database created in HIVE is stored as : (A) HDFS Block (B) A JAR File (C) A directory (D) A file	1
27.	When a managed table is dropped: (A) Both the schema and the data is dropped (B) An error is thrown (C) The schema gets dropped without dropping the data (D) The data gets dropped without dropping the schema	1
28.	Hive cannot offer: (A) Online Transaction Processing (B) Storing data in tables and columns (C) Partitioning stored data (D) Handling date time data	1
29.	A GenericUDF is a Function that: (A) Detects the type of input programmatically and provides appropriate response (B) Take zero or more inputs and produce multiple columns or rows of output (C) Takes one or more columns form a row and returns a single value	1

	(D) Takes one or more columns form many rows and returns a single value	
30.	A view in HIVE can be dropped by: (A) Drop view (B) Drop Table (C) Delete view (D) Remove view	1
31.	Spark SQL provides a domain-specific language in Scala, Java, or Python to manipulate: (A) RDDs (B) Streaming (C) Spark SQL (D) ML Pipelines Answer: (A)	1
32.	The transformation is which of the following? (A) flatmap() (B) foreach() (C) count() (D) save()	1
33.	The basic abstraction of Spark Streaming is: (A) Shared Variable (B) Lazy Evaluation (C) DStream (D) RDD	1
34.	The Machine Learning API Is based on: (A) Dataframe (B) RDD (C) Dataset	1

35.	Which of the following is not common features of RDD and Dataframe are : (A) Immutability (B) In-memory (C) Resilient (D) Aggregation	1
36.	The fundamental data structure of Spark is : (A) DataFrame (B) RDD (C) Dataset (D) CSV file	1
37.	Which method of DataFrame streaming is used to extract first n records from source stream? (A)load (6): It will load the first six records. (B)first(5): It will load the first five records. (C)Extracting first n records is not supported in Spark Structured Streaming source. (D)start(limit=5): It will start a stream and read only five records.	1
38.	You can drop the duplicate data on Spark Streaming DataFrame considering the late arrival of data on a period of 1 to 10 minutes with watermarking to handle late arrival data. Is the statement: (A) TRUE (B) FALSE	1
39.	Spark is developed in which language (A) JAVA (B) Scala (C)Python (D) R	1

40.	Spark uses Hadoop in how many ways : (A) 2 (B) 3 (C) 1 (D) 4	1
-----	--	---

.
