

1. Write a program to calculate the sum of all the numbers in a given list using a for loop.
2. Write a program to check if a given number is prime or not using a for loop.
3. Write a program to print all prime numbers between two given numbers using a for loop.
4. Write a program to check if a given string is a palindrome or not using a for loop.
5. Write a program to reverse a given list using a for loop.
6. Write a program to print the multiplication table of a given number using a for loop.
7. Write a program to find the sum of the first 100 natural numbers using a for loop.
8. Write a program to find the sum of the digits of a given number using a for loop.
9. Write a program to count the number of characters in a given string using a for loop.
10. Write a program to find the length of the longest increasing subsequence of a given list using a for loop.
11. Write a program to check if a given list is sorted in non-decreasing order using a for loop.
12. Write a program to sort a given list of numbers in ascending order using a for loop and the bubble sort algorithm.
13. Write a program to find the median of a given list of numbers using a for loop.
14. Write a program to find the sum of all perfect squares between two given numbers using a for loop.
15. Write a program to find the GCD (Greatest Common Divisor) of two given numbers using a for loop.
16. Write a program to find the LCM (Least Common Multiple) of two given numbers using a for loop.
17. Write a program to find the sum of all odd numbers between two given numbers using a for loop.
18. Write a program to find the sum of all even numbers between two given numbers using a for loop.
19. Write a program to generate a list of all possible permutations of a given string using a for loop.
20. Write a program to find the maximum element in a given list using a for loop.
21. Write a program to find the minimum element in a given list using a for loop.
22. Write a program to print the Fibonacci sequence up to a given number using a for loop.
23. Write a program to calculate the factorial of a given number using a for loop.
24. Write a program to count the number of vowels in a given string using a for loop.
25. Write a program to check if a given list is a palindrome or not using a for loop.
26. Write a program to remove all even numbers from a given list using a for loop.
27. Write a program to remove all odd numbers from a given list using a for loop.
28. Write a program to print the first N prime numbers using a for loop.
29. Write a program to find the sum of all prime numbers between two given numbers using a for loop.
30. Write a program to check if a given string is an anagram of another string using a for loop.

31. Write a program to find the largest palindrome that can be made by multiplying two three-digit numbers using a for loop.
32. Write a program to generate a list of all prime factors of a given number using a for loop.
33. Write a program to find the number of times a given substring appears in a given string using a for loop.
34. Write a program to find the largest and smallest numbers in a given list using a for loop.
35. Write a program to count the number of words in a given string using a for loop.
36. Write a program to find the common elements between two lists using a for loop.
37. Write a program to remove duplicates from a given list using a for loop.
38. Write a program to reverse a given string using a for loop.
39. Write a program to check if a given number is a perfect number or not using a for loop.
40. Write a program to check if a given number is an Armstrong number or not using a for loop.
41. Write a program to generate a list of all Armstrong numbers between two given numbers using a for loop.
42. Write a program to find the sum of all even numbers in a given list using a for loop.
43. Write a program to find all pairs of elements in a given list that add up to a given sum using nested for loops.
44. Write a program to print the first N terms of the series 1, 2, 4, 7, 11, 16, ... using a for loop.
45. Write a program to find the number of occurrences of each element in a given list using a for loop.
46. Write a program to find the number of even and odd numbers in a given list using a for loop.
47. Write a program to find the number of vowels and consonants in a given string using a for loop.
48. Write a program to generate a list of all perfect numbers between two given numbers using a for loop.
49. Write a program to generate a list of all strong numbers between two given numbers using a for loop.
50. Write a program to find the sum of all odd digits in a given number using a for loop.
51. Write a program to print a staircase pattern using nested for loops.
52. Write a program to generate the following pattern using nested for loops:
1
2 2
3 3 3
4 4 4 4
5 5 5 5 5
53. Write a program to print a diamond pattern using nested for loops.
54. Write a program to generate the following pattern using nested for loops:

1

2 3

4 5 6

7 8 9 10

11 12 13 14 15
